Project Plan

For my self-introduction website

By Tianxin Chu

1. Template Used

startbootstrap-creative

https://github.com/BlackrockDigital/startbootstrap-creative

2. My own design

2.1 Navigation bar:

There would be a 100% width navigation bar appears at the top of screen. Even when scrolling down, it will stay at the top.

Left: "Tianxin Chu's Homepage"

Right: (From left to right) "About", "Skills", "Experience", "Contact"

When clicked, the page will be scrolled down to the designated body. (See 2.3)

Right content will be replaced by a dropdown menu button when resolution is lower than a certain value. (Implemented in the template)

2.2 Header

Full-window sized picture with one sentence to say welcome.

A button says "Find out more" which will scroll down the page to the beginning of the main content after clicked.

2.3 Main content

2.3.1 About

A short paragraph to generally introduce myself.

A button says "Next: Skills" which will scroll down the page to the beginning of next section after clicked.

2.3.2 Skills

Four columns, each with an icon and one sentence to describe my programming skills in four different aspects.

A button says "Next: Experience" which will scroll down the page to the beginning of next section after clicked.

2.3.3 Experience

2 x 3 table with 100% occupied images to show my experience including my work experience, projects and training.

When hover, display one sentence on top of the image to introduce this experience.

One sentence after the image table to say something like "Enthusiastic programmer you don't want to miss!"

A button says "Contact ->" which will scroll down the page to the beginning of next section after clicked.

2.3.4 Contact

Format similar to the template, with my phone number and email address.

The email will be clickable to send an email.

The phone number will be clickable to call.
